“Every tissue in the body is as clean as the bowel. This is due to the fact that every tissue is fed by the blood which is nourished by the bowel. When the bowel is dirty, the blood is dirty and so on to the organs and tissues. It is the bowel that must be cared for first.”

Dr. Bernard Jensen ~ Chiropractor, Nutritionist, Lecturer, Author

What Is Colon Hydrotherapy?

Colon Hydrotherapy is the infusion of filtered, temperature-controlled water into the colon through a small nozzle that is inserted into the rectum. The nozzle is a flexible piece of tubing and is about the size of a # 2 pencil. When water is introduced into the colon it will hydrate the feces and allow the feces to be gently eliminated from the body.

Why Clean The Colon?

The colon is the most neglected and forgotten part of the body. Colon health today emphasizes prevention rather than cure. By eating a proper diet, exercising regularly and colonics, a person can regain and maintain a healthy colon.

What Can I Expect From Colon Hydrotherapy?

Colon Hydrotherapy is a time proven positive adjunct to any health, weight loss or detoxification program. The colon tends to accumulate toxins due to poor eating habits, lack of exercise, stress and emotional holding patterns. Reabsorption of these toxins into the bloodstream can set the foothold for disease. Colon cleansing allows for cleaner bloodstream, improved digestion and elimination, greater vitality and better assimilation of vital nutrients.
